

Madera County Superintendent of Schools-Preschool Programs

The Madera County Superintendent of Schools supports comprehensive early education opportunities for children and families, including part-day State Preschool and full-day child care and development services. Driven by the belief that the key to self-sufficiency is helping others help themselves, our clients and their families are our top priority. Our philosophy is to build a positive and solid foundation for success in school, and this is accomplished through an active learning curriculum, which includes parents, children, and teachers together. Children will receive teacher directed instruction and opportunities to learn through choice of interactive play experiences with other children in class. The overall classroom experience for both children and families will support the growth of academic, social, and healthy living skills.
